Creating the perfect garage interior

HUDDERSFIELD

INSTALLATION

iKON Interiors was approached to provide a storage solution with suitable work areas to secure and tidy up various items for a domestic treble garage on the outskirts of Huddersfield, West Yorkshire.

We proposed a 5m Run of storage cabinets comprising of:-

- 1x full height cabinet with integral 6 drawer set, louvre panel and perforated doors
- 2x half height sliding door cabinets
- 1x half height 8 drawer set (Central locking)
- 1x full height shelved unit
- 3x 1m wide overhead sliding door cabinets

Installation time - 1 working day

Client commented: -

"I have searched the Internet for quite a while before a friend recommended Garage iKON to me. I know that garage interior refurbs is big business in the States but trying to find a suitable UK company was not easy."

*"Garage iKON Interiors provided me with various options on their proposal layouts and tweaked the designs as required. The fitters completed the job in a morning. **Very impressive!!!**"*

SHEFFIELD

INSTALLATION

The client had a requirement for a barn interior to have a new level floor and secure attractive storage for bikes, tools, cleaning materials and general storage.

The solution included:-

- Smooth grey resin self levelling epoxy resin floor to create a great looking floor that is easy to clean and hard wearing.
- 6.9m run of cabinet, drawer storage with worktop area all raised on bespoke 100mm plinths to accommodate existing brick skirting and 2x custom made tall storage units that had to fit between steel structural uprights. One of the tall cabinets is sub divided with a hanging area for bike leathers and bulk storage
- 2.3m length to ceiling height of plastic slatwall storage and associated hooks for bike and workmate storage
- Additional slatwall storage supplied and fitted above work surfaces for tool storage
- Additional worktop with twin leg supports supplied and fitted for horse 'tack' room.

Installation time - 1 working day

Client commented: -

"Garage Ikon has provided me with excellent garage storage units, slatwall and flooring. Their service has been superb delivering and installing when they said they would. Everything looks fantastic and all the clutter is cleared away and the Barn interior gives a great impression creating the Wow factor with anybody that sees it"

NEWCASTLE

INSTALLATION

Garage Ikon was approached to provide a bespoke garage interior for a discerning client who was carrying out a full property refurbishment project.

Last into the project were Ikon Garage Interiors offering: -

- All in custom colours to represent horse racing stable colours
- 2x Runs (4.5m & 2.9m) of Garage Ikon steel storage cabinets, drawer units, louvred panel for bin storage and black linoleum worktops. All the steel was powder coated in a textured finish.
- Bespoke electrics cabinet – to cover multiple circuit boards the cabinet had to be designed with no back and a cut outs.
- A run of 7m length x 2.4m high double door fronts to cover pipe work with raised handles to prevent small children accessing what is behind the doors. This was a specific request from the client. The area was prepared with timber frame work to counter any imperfections in the original concrete flooring.
- Full area Ikon tile flooring installation (approx. 60 square metres) in toffee brown and 2x black stripes to represent stable colours.

Installation time - 3 working days

Client commented: -

"We are delighted with the appearance of our garage and the quick installation. We would recommend Ikon Garage Interiors to anyone who requires the interior of their garage converting"

Bespoke solution required to cover boilers and pipework

WARWICKSHIRE

INSTALLATION

The client had a requirement to create a motorcycle museum in a recently refurbished barn area.

Ikon Garage Interiors were invited to quote for a 4 metre run of heavy duty steel storage cabinets.

The run consisted of 2x 2m high units and 2x 900mm high units with drawer storage and suitable working area. One of the tall units had a specific hanging area for motorcycle leathers and a shelved area for helmets. These units were manufactured from 1.2mm thick sheet steel with flush fitting handles on adjustable feet.

The installation took less than 1 working day to complete including nesting the cabinets together, wall fixing and fitting the worktops.

Installation time - 1 working day

Client commented: -

"I am really glad I contacted Garage Ikon as I was struggling to find what I required on Internet searches. Their cabinets are of a good quality and certainly look the part"

LEEDS

INSTALLATION

Working for a prestigious car re-styling brand based in Leeds Garage Ikon designed, manufactured and installed a range of bespoke storage cabinets and workbenches to create a showcase workshop area.

The installation included 19 double hinged door steel cabinets (11 floor mounted on plinths & 8 wall mounted cabinets) to creating storage and workspace for the vehicle technicians. The 13.5m run had to accommodate 2x existing mobile Snap On cabinets and 2x 2m workstations with storage underneath.

The cabinets were finished in contrasting mid grey carcass with black doors with flush fitting 'non snag' handles creating a functional and attractive work environment.

Installation time - 1 working day

Client commented: -

"The guys at Garage Ikon were brilliant at getting back to me with the redesigns and revised proposals to suit exactly what we wanted. The fitting team were on site when they said they would be and worked hard to get the job done."

FLOORING

TILES, SKIRTING & UNDERLAY

This is not just any garage floor covering, but a revolutionary tile product designed to meet all your domestic garage and concrete floor covering needs.

Using virtually seamless interlocking edges the foot square tiles provide a strong, simple to fit and durable finish to any level floor. The wide range of tile colours enable a sophisticated showroom appearance to be easily created and the finished covering provides a layer of insulation, keeping your feet and stored items away from the cold concrete below.

Colour options

Skirting board

Provides a superior wall finish at tile junction allowing expansion underneath and covering any cut tile edges. Looks like wood and accepts all standard paint finishes. Lightweight and easy to fix and will not easily break, crack or split. Damp resistant.

Underlay

Using featherfoam underlay gives additional cushioning and thermal insulation plus eliminates any potential tile 'tapping' noise on concrete floors. Note: Do not use near naked flames or in areas exposed to high temperatures.

Garage iKON also offers a comprehensive range of resin flooring options.
